PART 1: INTRODUCTION

Macroeconomics and the Real World

The Problems of Macroeconomics

What Is Macroeconomics?

Macroeconomics Defined

The Origins of Macroeconomics

Positive versus Normative Macroeconomics

Doing Macroeconomics

Macroeconomics as a Science Social Sciences versus Natural Sciences Rational Behavior

Observation versus Controlled Experiments

Models and Maps Models as Maps Mathematical Models The Uses of Models The Scope of

Models Graphical or Diagrammatic Models

Where Do We Go from Here?

PART 2: THE NATIONAL ACCOUNTS

The National Accounts and the Structure of the Economy

How Big Is the Economy?

GDP and the Economic Process

Stocks and Flows

The Circular Flow

The Domestic Private Sector Investment Savings, Capital, and Time The Government Sector

The Foreign Sector A Bird's-Eye View of the Economy

The National Accounting Identities

The Production-Expenditure Identity

The Disposable-Income Identity

The Sectoral-Deficits Identity

The Inflow-Outflow Identity

Box 2.1. The Twin-Deficits Problem and the Sectoral-Deficits Identity

Real Gross Domestic Product

Real and Nominal Quantities

Converting Nominal to Real GDP

International GDP Comparisons

Population and Real per Capita GDP

GDP through Time

Visualizing Growth 1: Growth Rates

Visualizing Growth 2: Logarithmic Graphs

Measuring Inflation

Inflation and Deflation

Measuring Inflation Using the GDP Deflator

Economic Behavior and the National Accounts: Aggregate Demand and Supply - A Prelude to
Later Chapters

Understanding Gross Domestic Product

What Is a Final Product?

Quid Pro Quo

Final and Intermediate Products

Existing Goods

Product and Income

Domestic versus National Product

Depreciation and Net Product

Limits, Judgments, and Puzzles

Investment or Consumption?

Nonmarket Production Home Production

The Third-Party Test Owner-Occupied Housing Government Services

The Black Economy

Bads and Regrettables

GDP and Welfare

Measuring GDP

Sources and Methods

Revisions

Annualization and Seasonal Adjustment

Putting It All Together: Reading the NTPAs

The National-Income-and-Product Account

The Personal-Income-and-Outlay Account

Three Sectors, Three Deficits

Measuring Prices and Inflation

Constructing Price Indices

The Laspeyres (or Base-Weighted) Index

The Paasche (or Current-Weighted) Index

The Fisher-Ideal Index

The Chain-Weighted Index

Price Indices and Real GDP

The Implicit Price Deflator

Alternative Price Indices

The Consumer Price Index (CPI)

The Personal Consumption Expenditure Deflator

The Producer Price Index (PPI)

The Core Rate of Inflation

The Weighted-Median CPI

PART 3s TRENDS AND CYCLES

Trends and Cycles

Decomposing Time Series

The Business Cycle

The Language of Business Cycles

Dating the Business Cycle

The Typical Business Cycle

The Business Cycle and the Economy

What Causes the Business Cycle?

The Classification of Economic Indicators

Is the Business Cycle Predictable?

PART 4: FINANCIAL MARKETS

The Financial System

The Financial System and the Real Economy

The Role of Money and Finance Real Flows and Financial Flows The Monetary Economy

Financial Instruments and Financial Intermediaries The Flow of Funds

The Flow of Funds Accounts Real and Financial Wealth Accounting and Balance Sheets Flow Accounts

The Assets-and-Liabilities Accounts

Principles of Valuation

Present Value

The Principle of Similarity and Replacement

Two Key Concepts: Opportunity Cost and Present Value

Four Properties of Present Value

Real and Nominal Value A Useful Approximation

The Ex Ante versus the Ex Post Real Rate

The Main Financial Instruments

Debt

What Are Bonds? The Mechanics of Bond Pricing Types of Bonds Prices and Yields
Money

Equity

What Are Stocks? The Mechanics of Stock Pricing Stock Prices and Yields Stock Market
Indices

Financial Markets and Aggregate Demand

The Behavior of Interest Rates

Five Questions about Interest Rates

The Market for Financial Assets

Substitution and Arbitrage Similarity and Replacement Again Supply and Demand

Reaching Equilibrium in a Financial Market Arbitrage

Efficient Markets

Inside and Outside Views of Financial Markets The Efficient-Markets Hypothesis

Challenges to the Efficient-Markets Hypothesis Two Answers

Risk

Default Risk Risk and Return

Federal Government Bonds Rating Risk

Default Risk and Interest Rates

Price or Interest-Rate Risk

The Term Structure of Interest Rates

The Relationship of Interest Rates of Different Maturities

The Expectations Theory of the Term Structure Arbitrage across Different Maturities

Expectations and the Shape of the Yield Curve Alternative Portfolio Strategies

Implicit Expectations

The Role of Risk

Inflation and Interest Rates

The Effect of Inflation on the Supply and Demand for Bonds

The Fisher Effect and the Fisher Hypothesis Box 7.1. Measuring Expected Inflation

The Level of Real Interest Rates

Monetary Policy and Short Rates

Arbitrage to Real Returns

The Five Questions about Interest Rates Revisited Appendix: The LM Curve

Money Supply and Money Demand The Real Supply of Money Transactions Demand for Money

Money Demand and Interest Rates The Money Demand and Supply Curves

The LM Curve

Deriving the LM Curve What Shifts the LM Curve? What Use Is the LM Curve?

The Limitations of the LM Model

The International Financial System and the Balance of Payments

The Global Economy

Balance-of-Payments Basics 8.2.1 The Current Account

The Capital Account

The Balance-of-Payments Identities

Exchange-Rate Basics

Exchange Rates as the Relative Price of Money The Price of One Currency in Terms of Another

Appreciation and Depreciation

The Real Exchange Rate

The Real Price of a Foreign Good Purchasing Power and Price Indices

Effective Exchange Rates

The Foreign Exchange and Financial Markets

The Foreign-Exchange Market Foreign Exchange and Real Trade Foreign Exchange and

Financial Trade Direct and Indirect Exchange

Exchange Rates and Relative Prices The Law of One Price Purchasing-Power Parity

The Mutual Adjustment of Prices and Exchange Rates How Well Does Purchasing-Power Parity
Work in Practice?

Exchange Rates and Interest Rates

The Exchange Rate, Capital Flows, and Interest Parity Uncovered Interest Parity Exchange-Rate Risk

Interest-Rate Differentials and Short-Run Deviations

from Purchasing-Power Parity Interest Parity in Practice The Limits of Short-Run Exchange Rate Models

PART 5: AGGREGATE SUPPLY

Aggregate Production

The Production Decisions of Firms

Production Possibilities Technology

The Production Function Measurement Issues

Basic Properties of the Production Function Returns to Scale

Optimal Production Profit Maximization

Marginal Products and Factor Prices Choosing Input Levels

Aggregate Supply

The Aggregate Production Function

The Cobb-Douglas Production Function

Does the Cobb-Douglas Production Function Provide a Good Model of Aggregate Supply?

The Cobb-Douglas Production Function Predicts

Constant Factor Shares Are Factor Shares Constant?

A Cobb-Douglas Production Function for the United States

Productivity

Alternative Measures of Productivity Three Measures

International Comparisons

How Are the Productivity Measures Related?

Technological Progress Factor Productivity over Time Factor-Augmenting Technological Progress

Short-Run and Long-Run Aggregate Supply

Flexible and Inflexible Production Functions

Productivity and Resource Use in the Short Run

Measures of Resource Use Labor Utilization Capital Utilization

Potential Output

The Concept of Economic Potential

Scaled Output

Aggregate Supply: Questions Answered, Questions Raised

Economic Growth

Why Growth Is Important

The Labor-Supply Process Job Search

Employment Status and Job Flows The Duration of Unemployment

The Labor-Demand Process Job Creation and Destruction

PART 6: AGGREGATE DEMAND

An Introduction to Aggregate Demand

A Simple Model of Aggregate Demand

Consumption Behavior The Consumption Function

The Shape of the Consumption Function The Savings Function

Tax Behavior Net Taxes

The Tax Function
 The Shape of the Tax Function
 What Determines the Level of Aggregate Demand? The Model
 Equilibrium and Convergence to Equilibrium The Effect of Changes in Autonomous
 Expenditure on Aggregate Demand
 The Multiplier
 The Static Multiplier A Numerical Example The Size of the Multiplier The Multiplier Process
 Fiscal Policy
 Discretionary Fiscal Policy
 Choosing the Level of Government Spending
 Setting Tax Rates
 The Balanced-Budget Multiplier
 Automatic Stabilizers
 Investment and Aggregate Demand
 What Determines the Level of Investment? The Opportunity Cost of Investment Investment and
 Risk
 Investment and Finance (and Other Factors)
 The Investment Function in Practice
 The IS Curve Deriving the IS Curve
 An Increase in Autonomous Spending Shifts the
 IS Curve to the Right An Increase in the Rate of Return on Investment Shifts the IS Curve to the
 Right
 An Increase in Marginal Tax Rates Pivots the
 IS Curve Downward An Increase in the Marginal Propensity to Save The IS Curve and the
 Multipliers Numerical Examples
 Aggregate Demand and the Current Account
 Some Pitfalls
 The Behavior of Imports and Exports
 The Limits to Aggregate Demand Management
 The Paradox of Thrift
 Resource Constraints Appendix: The IS-LM Model
 The LM Curve and Expected Inflation 13.A.2 Working with the IS-LM Model
 An Increase in Government Expenditure An Increase in the Money Supply An Increase in the
 Rate of Inflation 13. A.3 The IS-LM Model at Full Employment
Consumption and Investment: A Deeper Look
 PART A. CONSUMPTION
 Simple Consumption Functions and the Real World
 The Permanent-Income/Life-Cycle Hypothesis
 Consumption Smoothing
 Consumption, Income, and Wealth
 The Aggregate Permanent-Income Hypothesis From the Individual to the Economy as a Whole
 How the Permanent-Income Hypothesis Explains the
 Data
 The Permanent-Income Hypothesis and Fiscal Policy
 Borrowing Constraints, Rules of Thumb, and Consumption
 Testing the Permanent-Income Hypothesis: A Natural Experiment PART B. INVESTMENT
 An Asset-Based View of Capital and Investment
 Evaluating an Investment Project
 The Present Value of an Investment Project Internal Rate of Return Investment and Risk
